PROFESSIONAL SUMMARY

Information Security Analyst with 4+ years across federal, financial, and enterprise environments, with a focused background in identity and access management, user lifecycle administration, and compliance-driven security programs. Hands-on experience deploying and administering MFA at scale, managing provisioning and de-provisioning workflows, and aligning IAM practices to NIST and federal governance standards. Proven ability to bridge technical requirements and business operations while supporting audits, access reviews, and security policy development.

CORE SKILLS & TOOLS

IAM & Identity Governance	MFA Deployment (Microsoft Authenticator) • User Lifecycle Management • Provisioning / De-provisioning • Access Reviews • Role-Based Access Control (RBAC) • Varonis DLP
Directory & Cloud Platforms	Azure AD / Intune • AWS • Microsoft 365 • SharePoint • Google Workspace
Security Operations	Incident Response • Vulnerability Management (Nessus) • SIEM / Taegis • KnowBe4 • Checkpoint
Compliance & Governance	NIST • DHS/CISA Frameworks • CIS Controls • Privacy Impact Assessments • System Security Plans
Tools & Scripting (foundational)	Jira / Confluence • ServiceNow (ticketing & workflow) • PowerShell • Python

EXPERIENCE

Information Security Analyst

Mar 2025 – Present

IMC Companies | Collierville, TN

- ▶ Administer Varonis Data Security Platform to monitor and protect sensitive data across Windows, SharePoint, and cloud repositories, including access entitlement reviews and anomaly detection.
- ▶ Led enterprise-wide deployment of Microsoft Authenticator MFA, managing provisioning, user enrollment, and exception handling for 1,000+ users across a hybrid environment — end-to-end identity lifecycle ownership.
- ▶ Designed and maintain IAM-aligned workflows in Jira, consolidating access requests, incident response, and compliance tracking across the InfoSec team.
- ▶ Serve as internal CIS Controls auditor, conducting safeguard-level assessments across the organization to evaluate compliance posture, identify control gaps, and develop remediation recommendations aligned to the CIS framework.
- ▶ Partner with IT and DevOps to enforce identity and access controls in hybrid cloud environments (AWS, Azure AD / Intune), including integration touchpoints for joiners, movers, and leavers.
- ▶ Maintain day-to-day access management operations, including account provisioning, access modifications, and periodic entitlement reviews to ensure least-privilege principles are upheld across systems.
- ▶ Collaborate with the IT team on IAM-related projects, providing security guidance on access model design, system integrations, and user authentication standards.
- ▶ Manage security awareness training via KnowBe4, segmenting campaigns by role and risk profile to reduce phishing susceptibility across user populations.
- ▶ Serve as acting Business Analyst for the InfoSec team — translating technical IAM requirements into business terms, mapping security workflows, and presenting risk posture dashboards to leadership.

IT Cybersecurity Specialist / Security Analyst

Jun 2024 – Oct 2025

CISA – Cybersecurity & Infrastructure Security Agency | Charlotte, NC

- ▶ Reviewed and maintained System Security Plans, Contingency Plans, and Privacy Impact Assessments in accordance with DHS standards and NIST 800-series controls.
- ▶ Conducted risk and vulnerability assessments on deployed and planned systems; analyzed Nessus scan results and coordinated remediation prioritization with system owners.

- ▶ Monitored DHS Information Security Vulnerability Management (ISVM) advisories and managed Nessus license distribution across the program.
- ▶ Provided technical guidance to department managers and cyber defense teams on incident escalation, access control design, and security architecture.
- ▶ Ensured operational activities aligned with continuous monitoring requirements, governance processes, and federal compliance standards.

CyberSuite Technical Support Analyst

Mar 2023 – May 2024

Wells Fargo | Charlotte, NC

- ▶ Validated customer configuration changes via CyberAdmin and User Access Management (UAM) tools; served as primary liaison between clients and product and engineering teams.
- ▶ Tracked and communicated production defects and client-reported issues to product partners, reducing resolution cycle time.
- ▶ Supported after-hours business validation following production releases and documented outcomes for cross-team visibility.

IT Helpdesk Specialist

Dec 2021 – Mar 2023

Armstrong Transport Group LLC | Charlotte, NC

- ▶ Managed IAM onboarding and offboarding for all company employees, including account provisioning, access assignments, and deactivation workflows.
- ▶ Administered the Jira Service Desk queue and escalation workflows, supporting service delivery across the enterprise.
- ▶ Contributed to automation initiatives and participated in enterprise IT projects to improve provisioning and configuration processes.

Carrier Relations Manager

Jan 2019 – Dec 2021

Armstrong Transport Group LLC | Charlotte, NC

- ▶ Managed EFS payment approvals and fraud prevention; analyzed carrier data for compliance with FMCSA regulations.
- ▶ Identified fraudulent carrier schemes and deceptive tactics through pattern analysis and operational investigations, directly exposing gaps in identity verification and access controls that sparked a transition into cybersecurity.
- ▶ Built cross-departmental relationships and maintained performance reporting for senior leadership.

Fraud Prevention Analyst

Feb 2012 – Feb 2014

Western Union | San José, Costa Rica

- ▶ Reviewed flagged transactions to identify fraudulent activity; analyzed large datasets to surface fraud patterns and anomalies.
- ▶ Collaborated on fraud trend analysis and developed countermeasures to reduce financial exposure.

EDUCATION

Cybersecurity Certificate

Dec 2022

University of North Carolina, UNC Charlotte | GPA: 4.00

A.S. Criminal Justice

May 2020

American InterContinental University | Dean's List • Honors | GPA: 3.95
